

# SASBT Abstract Writing Series

## WHERE DID THE DATA GO??

Karin van den Berg

25 Nov 2020

# A Quick Recap

# What is research (congress abstract)? and how does it differ from:

- \* Operational reports
- \* Educational reports / presentations

# 4 KEY ELEMENTS

- **Relevance (*Introduction*)**
  - Essentially the background
  - Explains why this is an important question
- **Question (*Methods*)**
  - What is the question that is being answered
  - Must be “FINER”
  - How did you do it?
- **Data (*Results*)**
  - Counted something
  - Which can be summarised / analysed
- **Conclusion (*Discussion*)**
  - Gives meaning to the results of your question

Anybody want to discuss their question for a few minutes?

It truly is the most important decision to make around your abstract

# This Session Will Focus on Getting Your Data

# WHERE DID THE DATA GO??

- Is it being **recorded**?
- Is it recorded **systematically** and **reproducibly**
  - Is everything that happens reported
  - Is everything that is reported recorded
  - Is everything that is recorded, recorded correctly
- **Where** is it recorded – paper vs electronic
- **Type** of data – free text vs categories vs counts vs sliding scales

In a population of x, is Y (predictor) associated with z (Outcome)

**Which is the best performing zone when it comes to audits?**

**How easy is it to answer this question?**

**Population?**

**Predictor?**

**Outcome?**

# CONSIDER THIS HYPOTHETICAL BLOOD SERVICE:

Zone	# DC	# Audits	# NC's	# Major	# Minor	#CoTime	#Repeat
EC	10	10	50	10	40	50	2
KZN	15	10	20	18	2	15	3
MPU	5	1	10	1	9	1	0
North	25	20	50	1	49	45	20
Egoli	70	50	75	25	50	70	0
Vaal	10	1	5	5	0	1	2
FS/NC	3	3	15	5	10	5	1

In a population of x, is Y (predictor) associated with z  
(Outcome)

If I don't get audited I can't get major nc...

In a population of **Audited SANBS Blood Banks** is **Zone**  
associated with **major nc**?

Probably still not perfect... but stick with it for now

WHAT DOES AN IDEAL DATASET LOOK LIKE?

Let's talk about the data you will  
require for your question...

# About getting you data...

- BI Request Rules:
  - Request via Service Desk
  - Need CLEAR instructions on what is required
  - Minimum 5 working days to get your data
    - May take longer if data is complex or not easily extracted

# THANK YOU!
